V. COA-2023-05-02- Rockwell Construction - “Owner Joe Schmackers” (Owner)
The work has uncovered that the exposed 2 wythe gable end brick of the west bldg is in bad shape and structural means to support/brace a new masonry wall could be very involved. We would like to simplify this wood framing and siding just to the roof truss bearing elevation. This is only exposed on the rear alley side of the structure in a limited area. The siding would match that already approved for the stair connector below. The Owner continues to reinforce the remaining brick walls; almost resetting every interior brick.
